TEACHER EDITION

ACKNOWLEDGMENTS	vii
INTRODUCTION	1
Environmental Inquiry	1
Meeting the Standards	1
Audience	2
WHY WATERSHED DYNAMICS?	5
Relevance	5
Connections	5
Research and Engineering Design Opportunities	6
Critical Thinking	7
LEVELS OF INQUIRY	11
Guiding Protocol-Level Inquiry	13
Conducting Interactive Research	14
<i>Field Studies and Experiments</i>	14
<i>Stormwater Treatment Design Challenge</i>	15
GUIDING STUDENT INQUIRY	19
About the <i>Teacher Edition</i>	19
SECTION 1. UNDERSTANDING WATERSHED DYNAMICS	21
Model Responses to Discussion Questions	21
SECTION 2. PROTOCOLS: INTRODUCTION TO RESEARCH	25
<i>Protocol 1 – Watershed Field Survey</i>	25
<i>Protocol 2 – Object Recognition Using Maps and Airphotos</i>	26
<i>Protocol 3 – Delineating a Watershed</i>	26

<i>Protocol 4 – Analyzing Stream Integrity Using Remote Sensing Data</i>	29
<i>Protocols 5–7 – Macroinvertebrates and Water Quality</i>	36
<i>Protocol 8 – Measuring Stream Discharge</i>	38
<i>Protocol 9 – Aquatic Chemistry</i>	38
<i>Protocol 10 – Computer Modeling with STELLA</i>	39
SECTION 3 – INTERACTIVE RESEARCH: FIELD STUDIES AND EXPERIMENTS	49
Why Interactive Research?	49
Choosing a Research Topic	50
Planning and Conducting Experiments Using Protocols	53
Analyzing Data	53
Interpreting Results	57
Designing Presentations	58
Inquiry Teaching Tips	59
SECTION 4 – INTERACTIVE RESEARCH: STORMWATER TREATMENT DESIGN CHALLENGE	61
Summary of the Procedure	62
Making Synthetic Stormwater	63
ASSESSMENT	65
Performance Assessment	65
Example Assessment Rubrics for EI Student Research	66
<i>Assessment Criteria for Student Research</i>	66
<i>Assessment Rubrics for Poster Presentations</i>	67
<i>Assessment Rubrics for Written Reports</i>	68
Sample Test Questions	70
REFERENCES	73
INTERNET RESOURCES	75
SOURCES OF AIR PHOTOS, MAPS, AND SUPPLIES	76
STUDENT EDITION
